The CDF Medical Advisory Board brings together internationally renowned and diverse experts in celiac disease, non-celiac gluten sensitivity, and dermatitis herpetiformis. These researchers and clinicians advance scientific knowledge by conducting and evaluating peer-reviewed research. Because of this expert advisement, CDF is able to provide individuals, medical professionals, and industry partners with trusted, evidence-based information and practices.

Marvin Ament, MD
Central California Children's Hospital

Betty Bernard, MD (Retired)
